

Startup

# ● Company Purpose

To improve capital efficiency, lower costs, and provide complex financial products to traders and investors.

## ● Problem

- DeFi Protocols lack liquidity which raises costs
- Slippage and Capital Efficiency in DeFi leads to losses
- Complex DeFi Products are not possible

# ● Solution ●

1

DeFi  
Compositions,  
split a user  
transaction into  
components

2

Optimization of  
splitting the  
transaction  
using  
optimization  
solutions and AI

3

Complex  
Products are  
possible such as  
derivatives on  
Real-World  
Assets

# WHY NOW?

Quickly Emerging Space

---

Automated Market  
Makers Implemented

---

Significant Growth

Dexs, Lending, Yield  
Aggregators

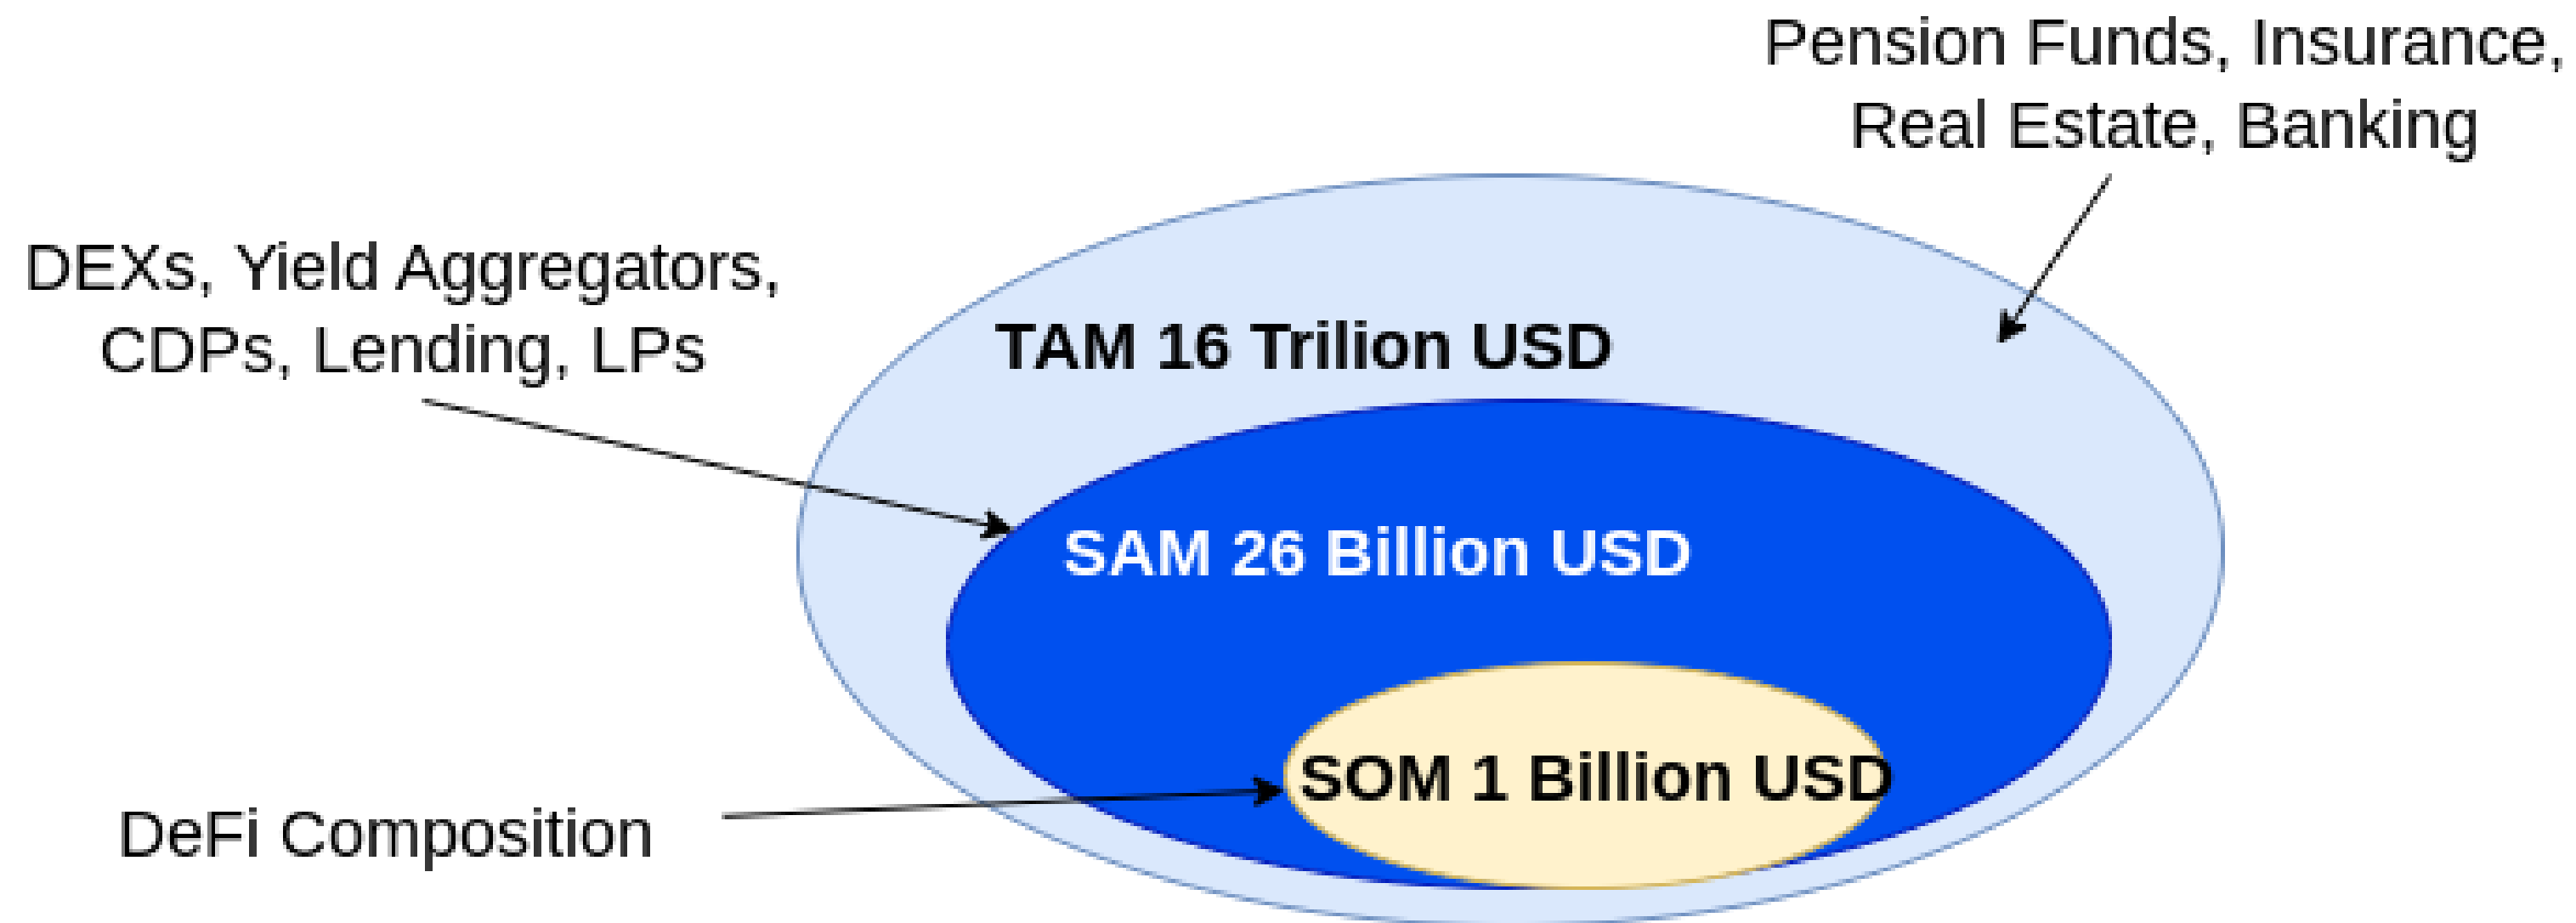

DeFi

Summer 2020 Emerges

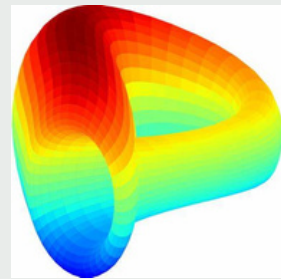

# ● Target Market

DeFi will compete with Tradl overtime. That is the TAM. SAM is the size of DeFi now, and SOM is DeFi Composition

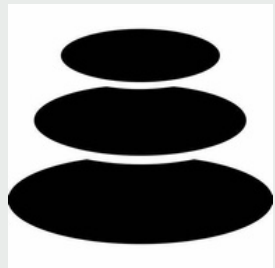

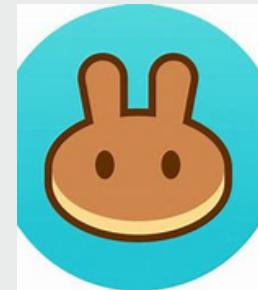

Uniswap

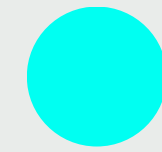

Curve

Balancer

Pancakeswap

# Competition

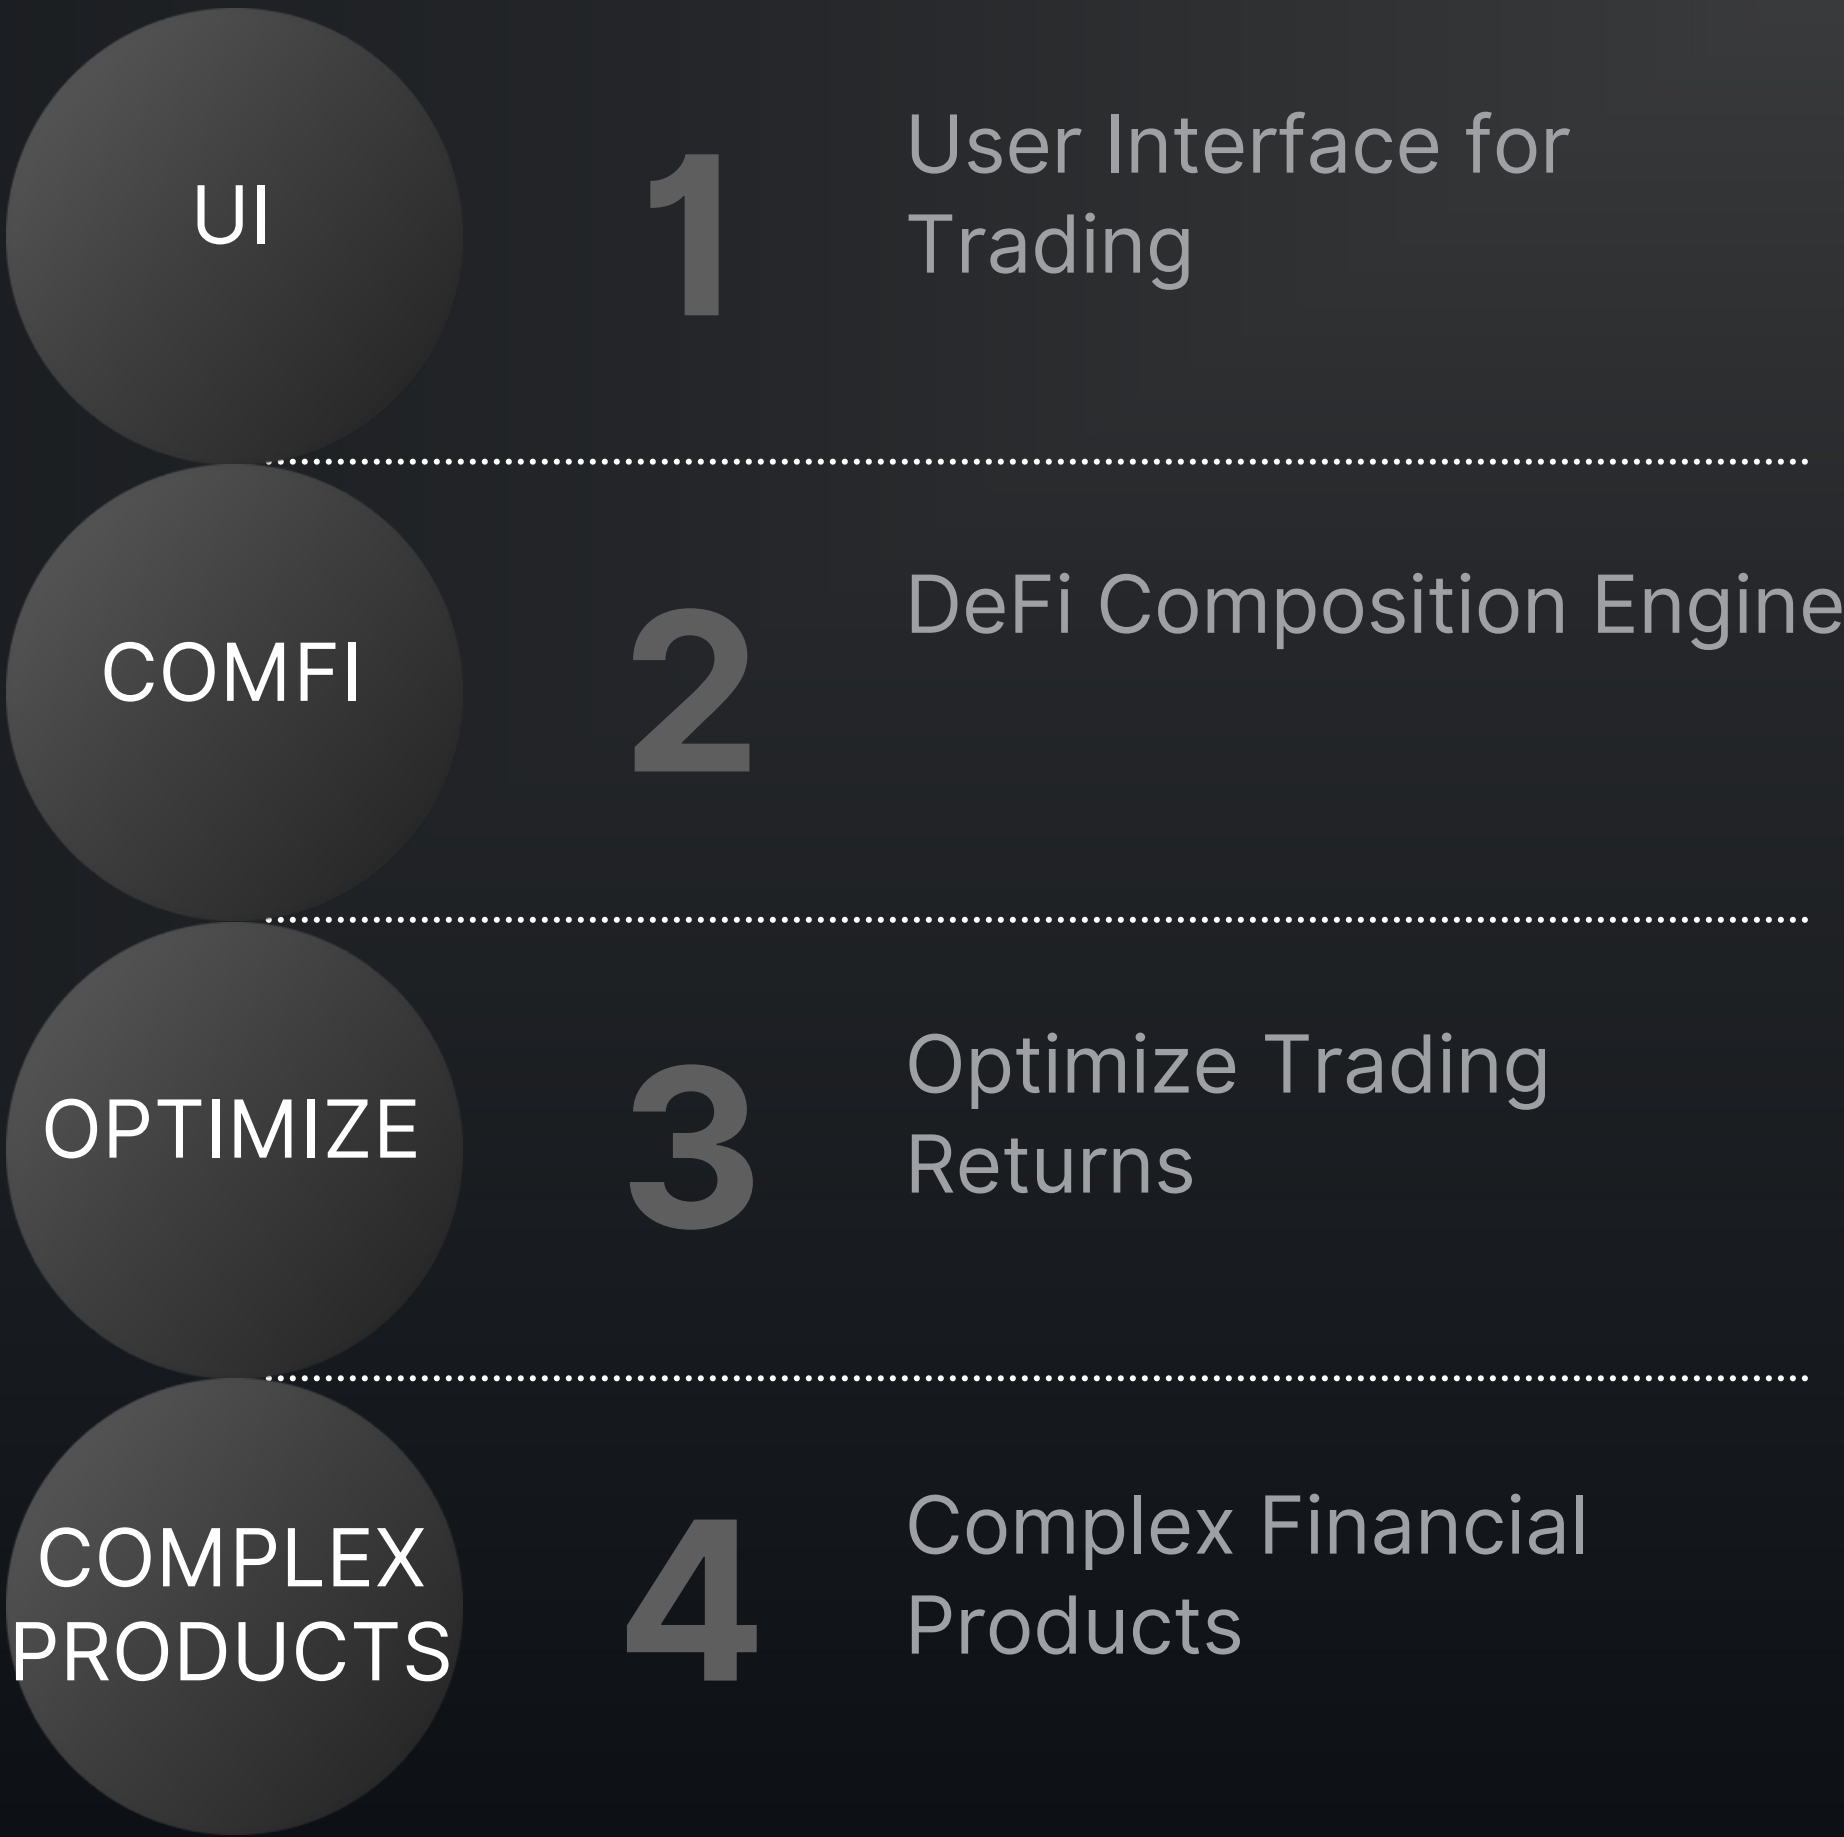

Limited competition due to the newness of the market, but some major competitors in related spaces are Uniswap, Curve, Balancer and Pancakeswap

# PRODUCT

DeFi Integrations and  
Composition

A full product for the  
user to optimally trade.

# BUSINESS MODEL

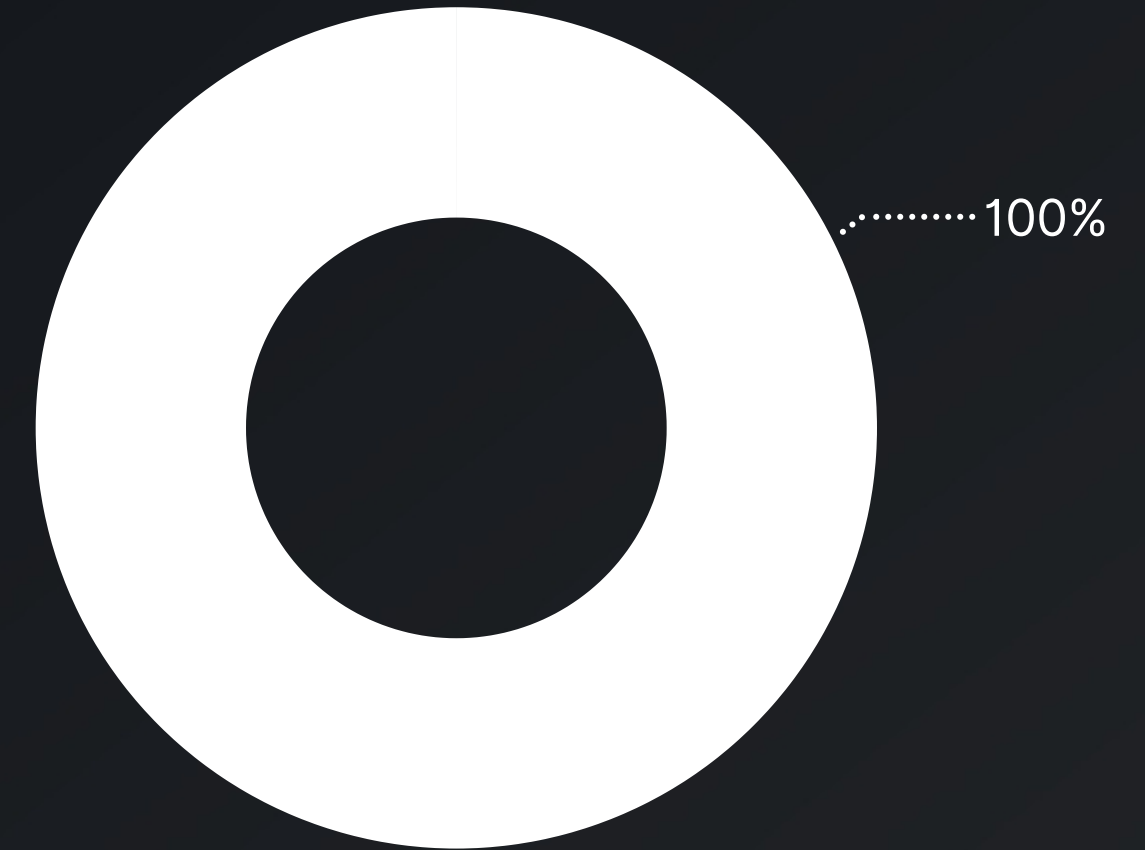

---

Transaction Fees

DEXs, Options,  
Liquidity Pools

Users pay via a UI  
transaction fees

100%

For Optimally Based ComFi  
Trades

# ● Our Team ●

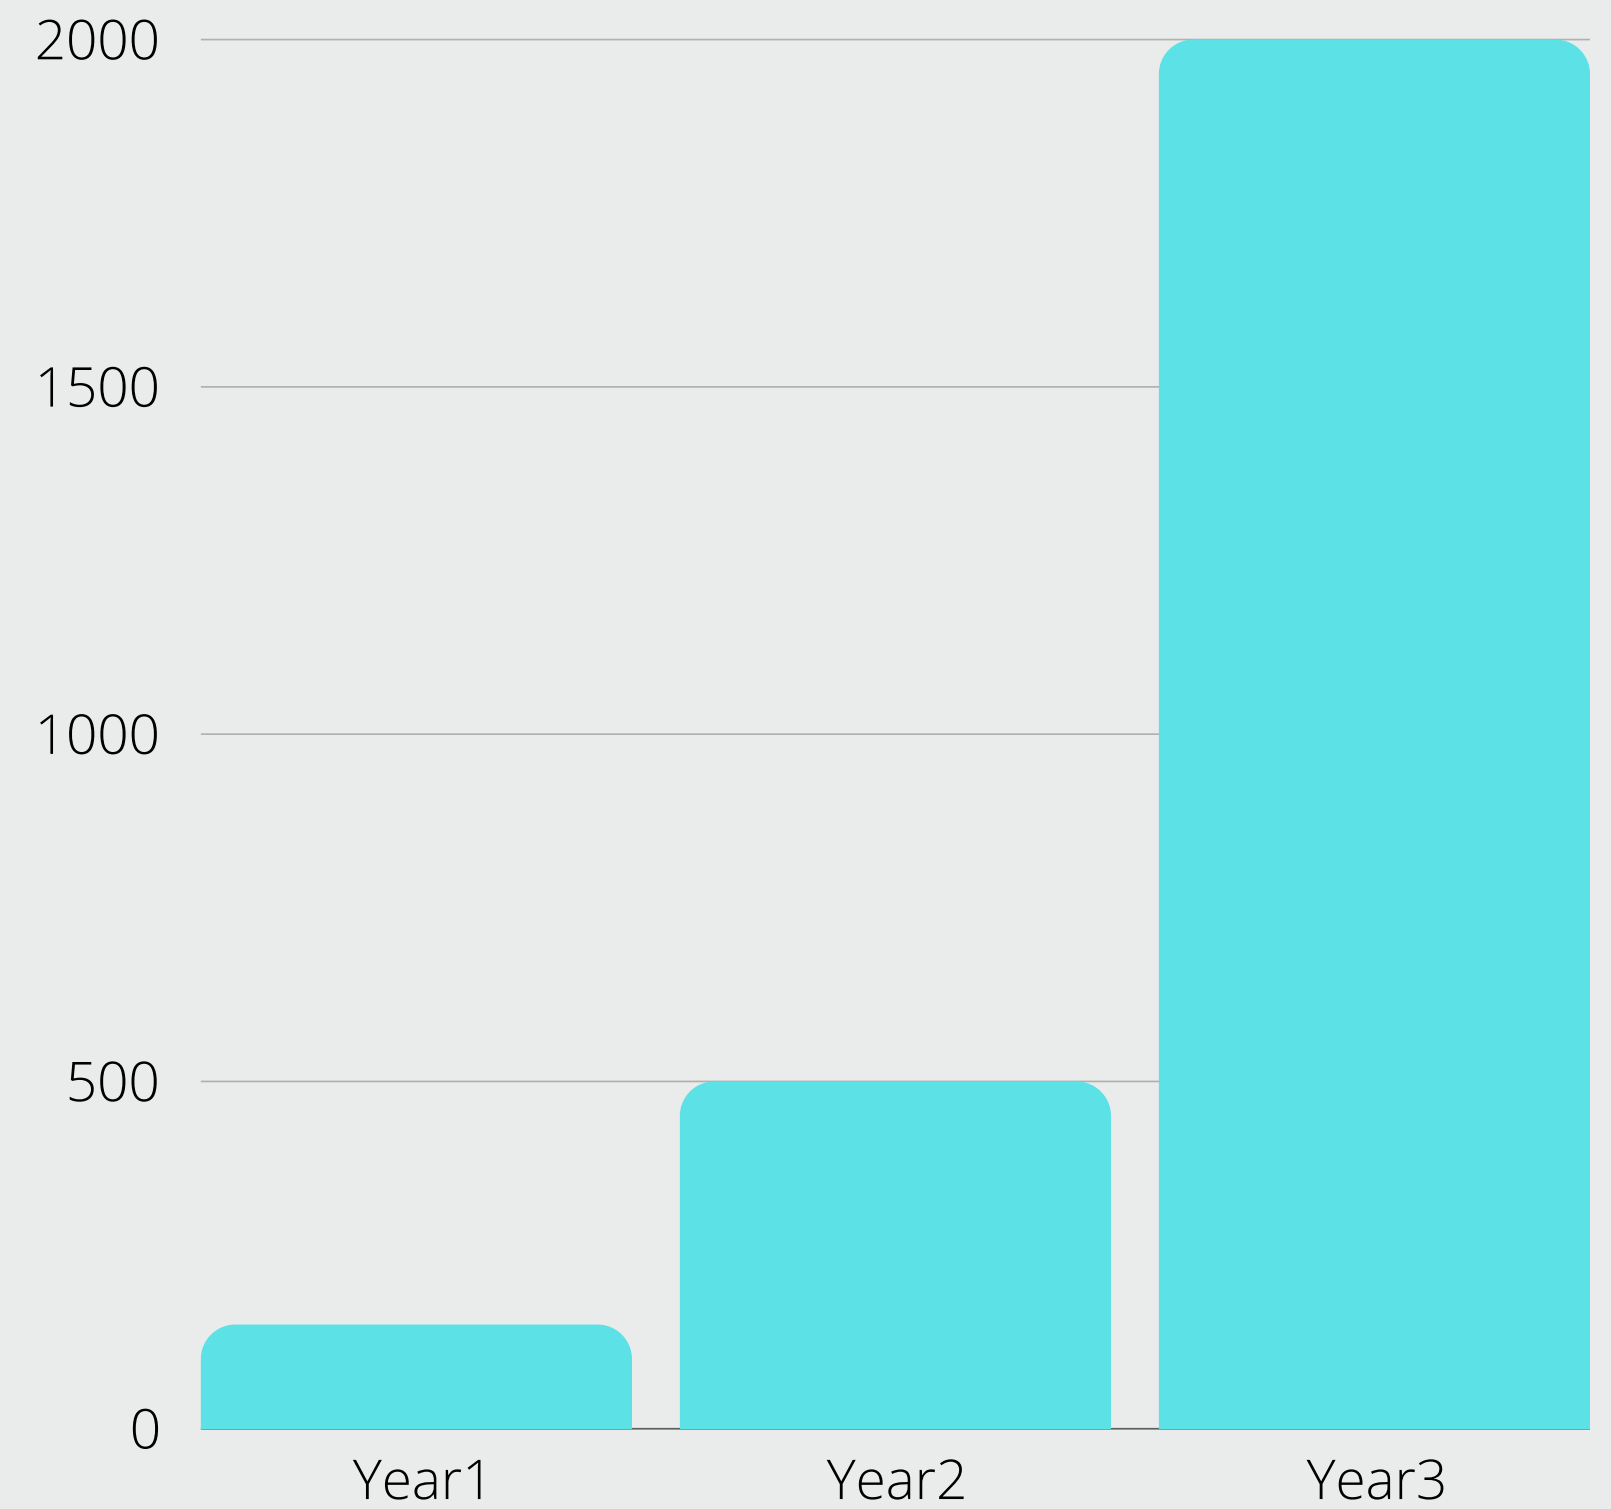

**Trevor Lee Oakley**

Founder

# ● Expected Traction

Transaction in 000s.
